

## Conflict of Interest

The author has declared no conflict of interest.

# High levels of mortality above the emergency threshold, Ouaka prefecture, Central African Republic: population-based mortality survey, 2020

## MSF Scientific Days 2021

Eve Robinson *on behalf of the study team*

# CAR – in a state of “silent crisis”

*“One day, you will come back and you won’t find anyone here  
because the problems will have killed us all”*

Mother of 10 children, Ouaka

- Decades of political unrest
- >70% under control of armed groups
- One of lowest ranking countries for many health indicators
- UN estimate crude mortality rate (CMR): 0.34 deaths/10 000/day

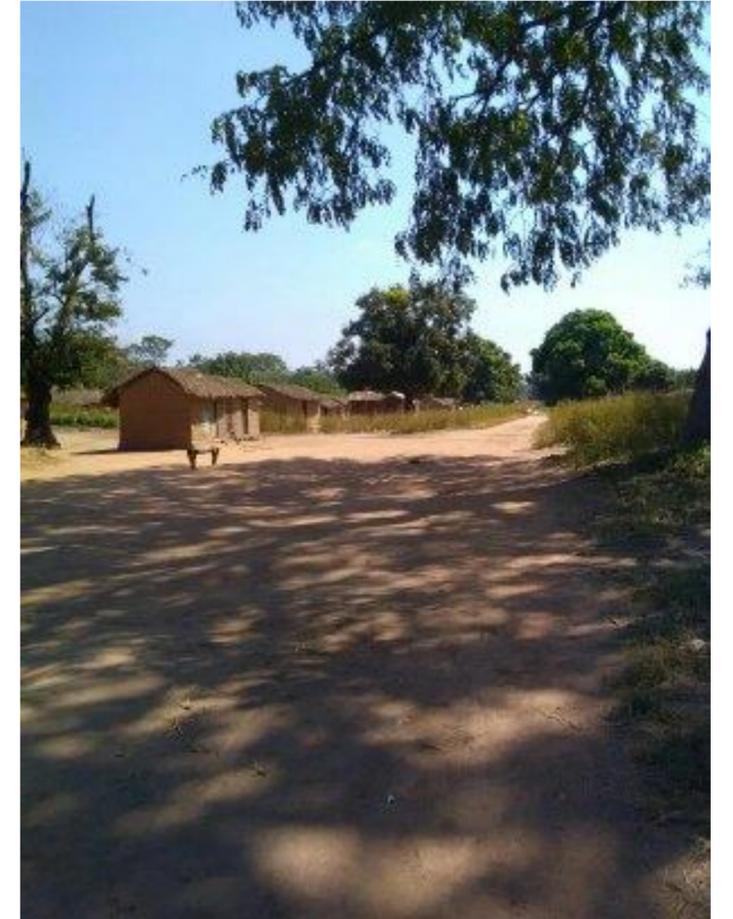

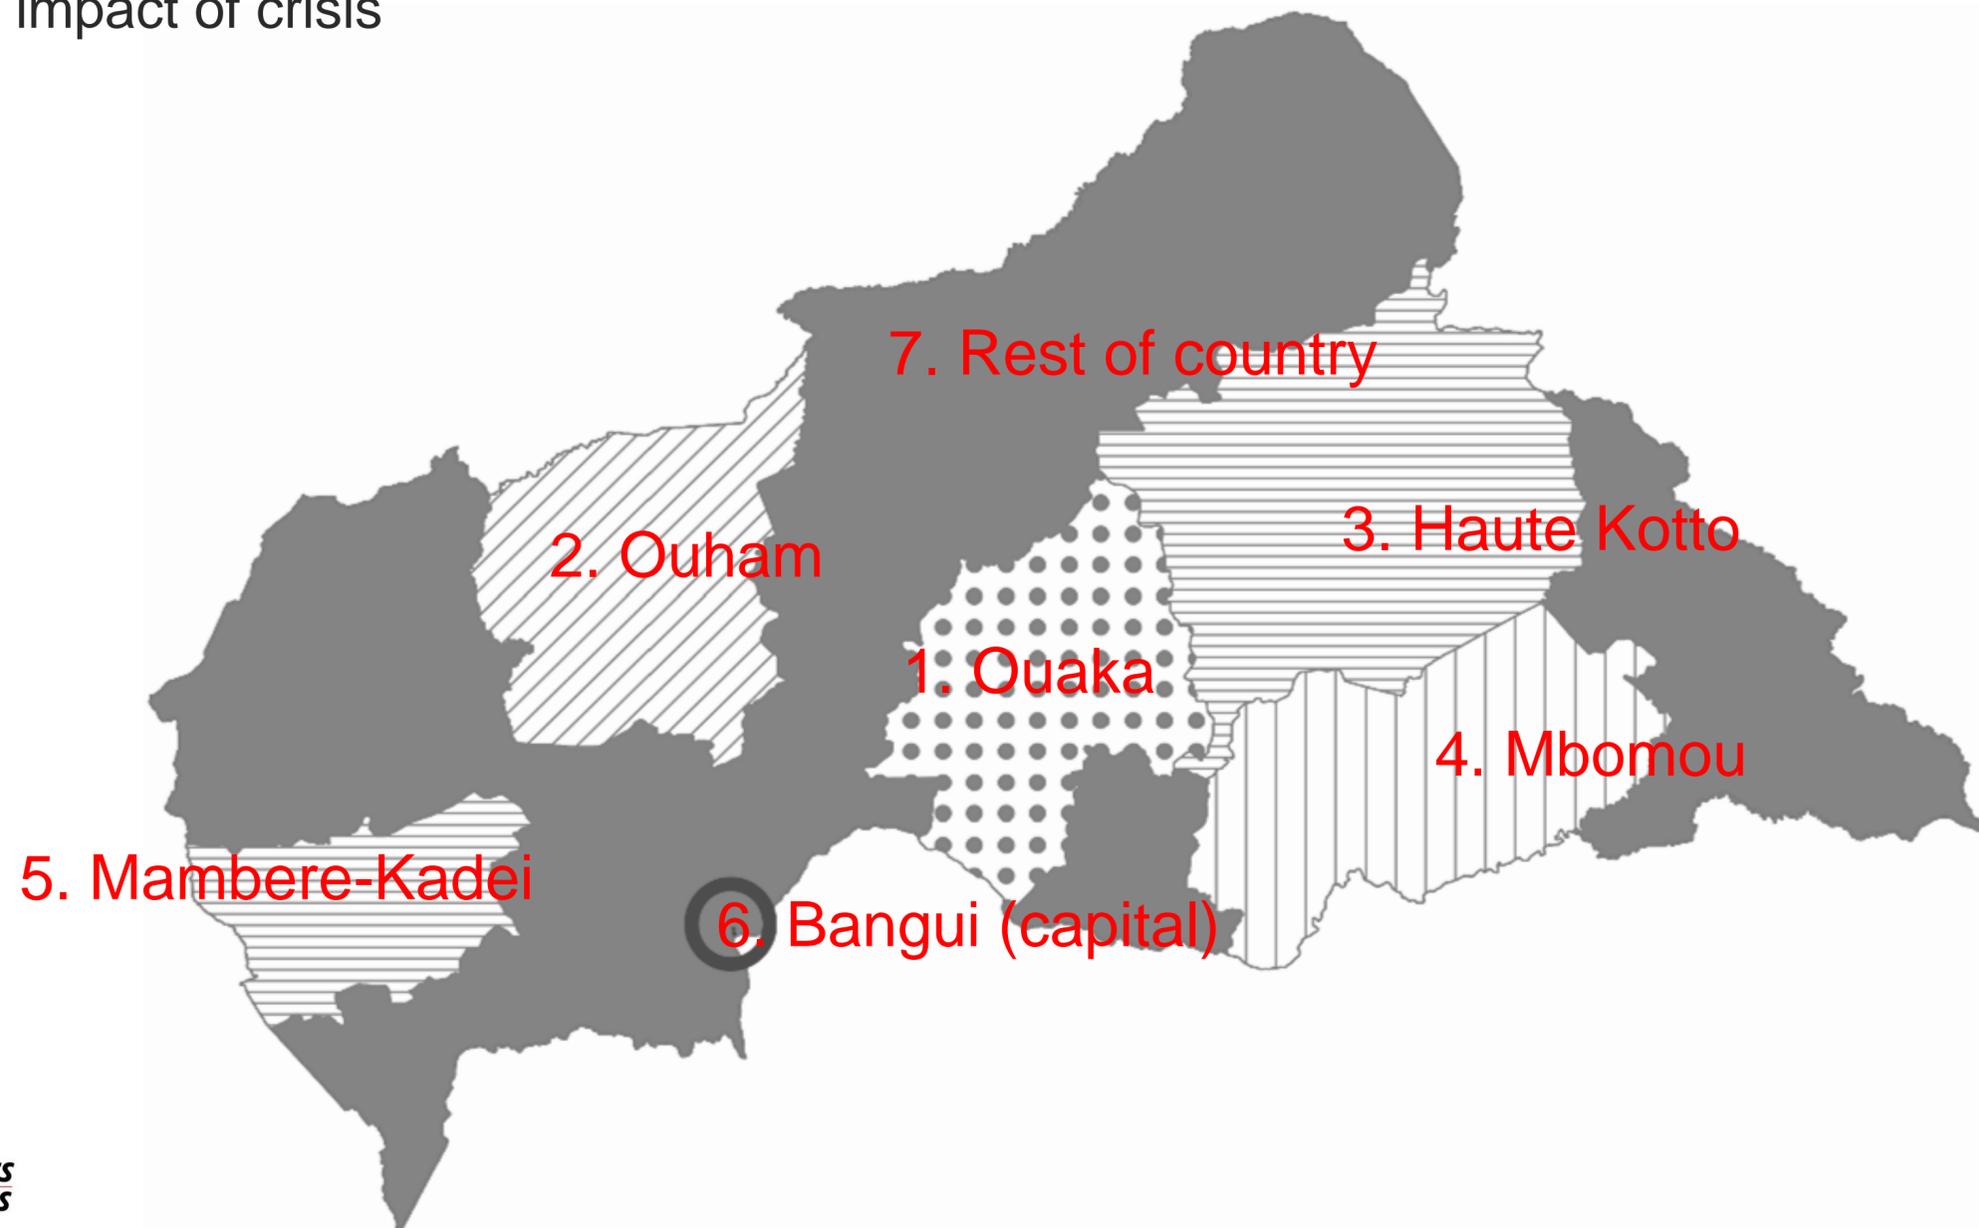

Photo by Eve Robinson

# Context – need for reliable mortality estimates

- Nationwide mortality study planned
  - Plan and prioritise programs
  - Document impact of crisis
  - Advocacy

# Methodology – Population based survey

Data collection

Recall period –  
26 May 2019

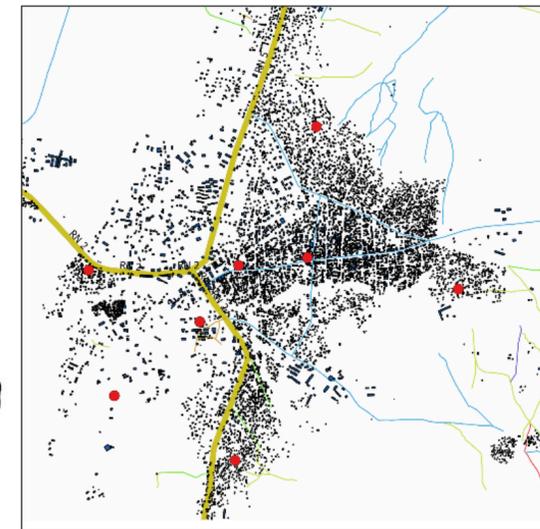

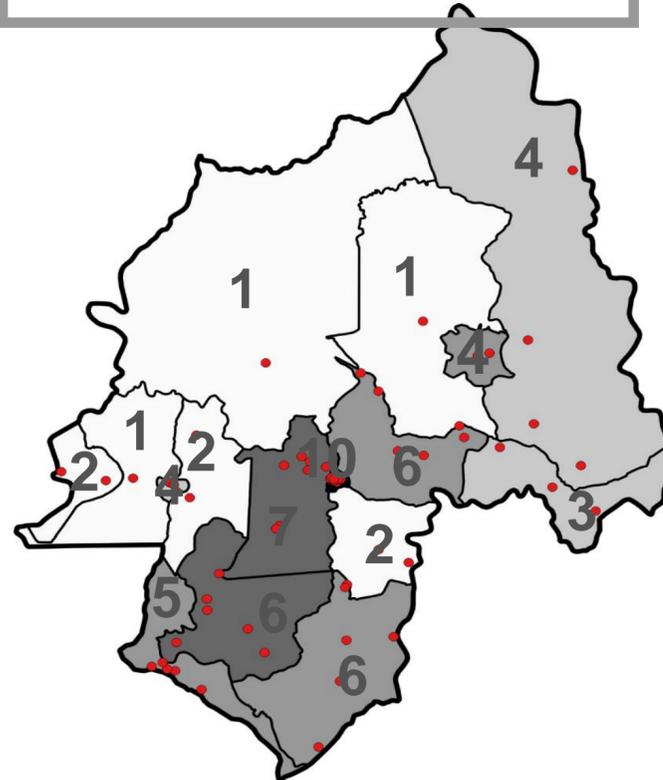

Target sample size –  
3,636 persons across  
765 households

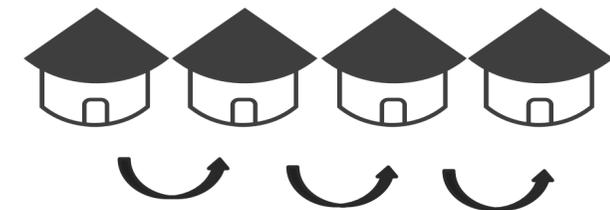

2-stage cluster sampling

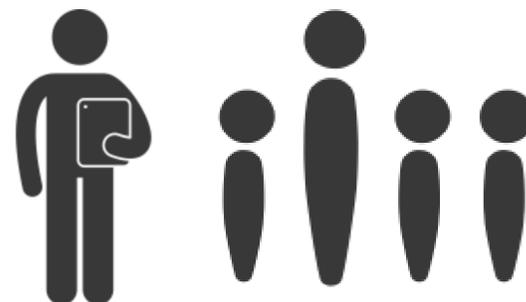

64 clusters

12 households per clusters

Structured interview with household head

Analysis

CMR & U5MR :  
Deaths/10,000,day

# Methodology – special features

Standard MSF questionnaire except for:

- Focus on mortality only
- Beginning with an opening question
  - « *What are the difficulties your household faces on a daily basis?* »
- Specific question on pregnancy and outcome
  - Early loss
  - Late pregnancy loss (incl. stillbirths)
  - Live birth – still alive
  - Live birth – no longer alive
- Training on identifying maternal and neonatal deaths

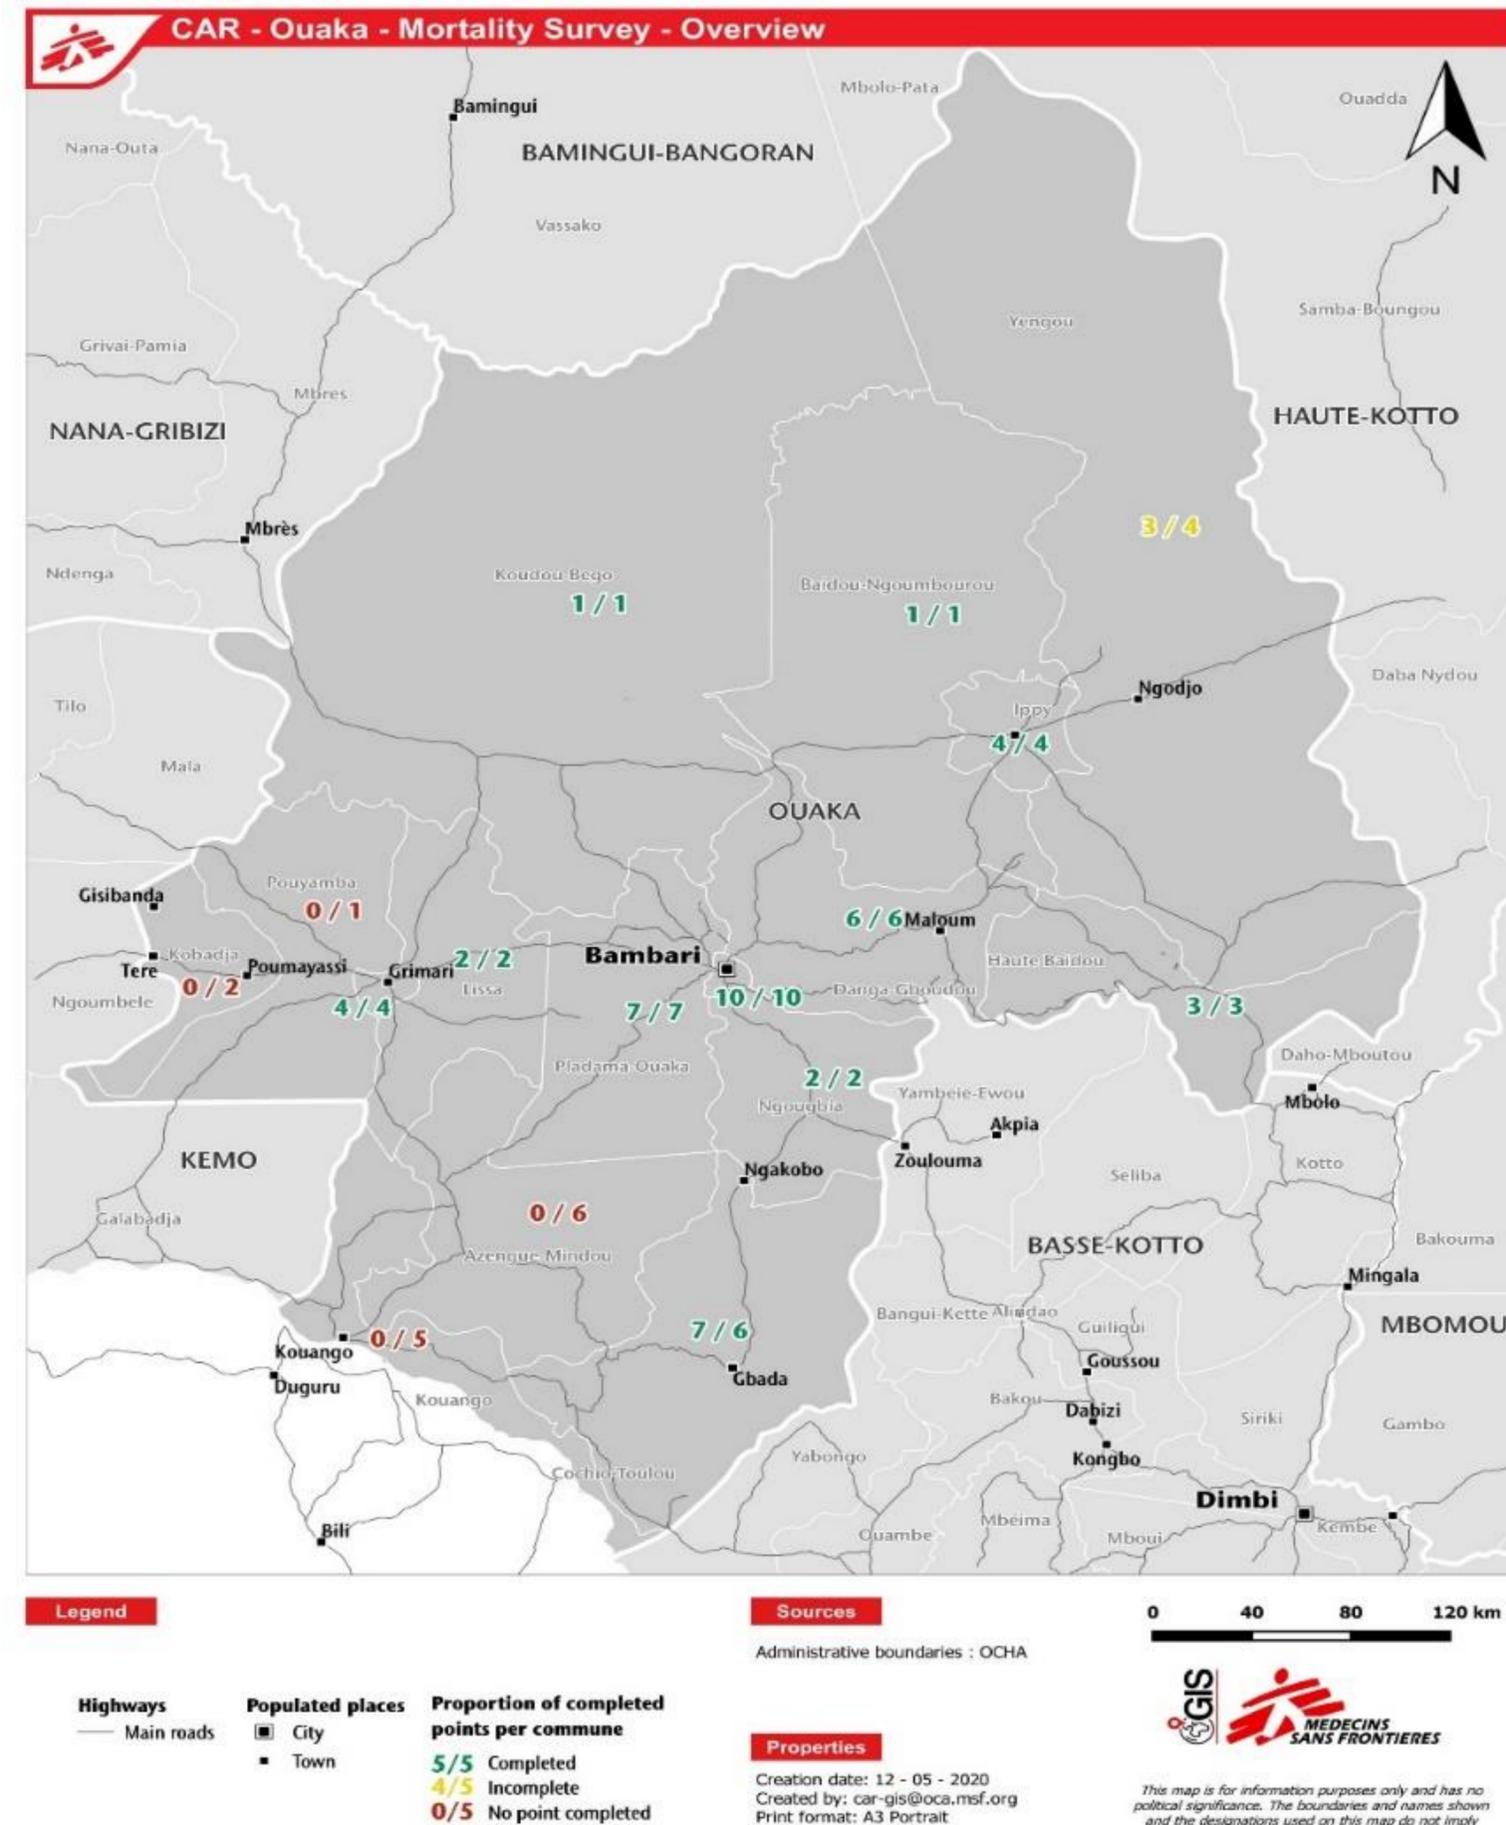

Photo by MSF CAR Communications team

# Study Population

- 50 clusters across 12/16 communes
- 591 households
- 4272 household members
- Median household size: 7 persons (IQR 4-9)

# Results – population structure

- Median age: 12 years
- <5 years: 22.8%
- Birth rate: 59.0/1000 population

# Results – causes of death

- **CMR: 1.33 deaths/10 000 persons/day (95% CI: 1.09—1.61)** (*emergency threshold – 1 deaths/10,000 /day*)

# Results – health seeking

- 62% sought healthcare prior to their death
- 38% did not seek healthcare prior to the death
- Reasons for not seeking care
  - Sudden death 50.9%
  - No money for the consultation 27.5%
  - Self medication 13.0%
  - Traditional healer 5.8%
  - Distance 5.6%
  - Security 5.4%

# Results – challenges faced by households

## Health (378 HHs)

***“The children have malaria constantly”***

[household 231, cluster 21, Pladama-Ouaka]

***“...it is necessary to go to Bambari for treatment”***

[household 168, cluster 14, Pladama-Ouaka]

***“We have a health centre but that requires money, we don't have money”***

[household 244, cluster 22, Pladama-Ouaka]

## Insecurity or conflict (130 HHs)

***“I lost my wife and....child due to crossfire”***

[household 326, cluster 30, Ippy]

***“We can't go to the fields”***

[household 187, cluster 16, Danga-Gboudou]

***“They burnt my house, I lost everything”***

[household 579, cluster 72, Yengou]

## Poor living conditions

***“To access water we must go 3km into the bush”***

[household 541, cluster 66, Pladama-Ouaka]

***“We live on only wild yams”***

[household 131, cluster 11, Danga-Gboudou]

***“we have money difficulties”***

[household 322, cluster 29, Ippy]

Photo by MSF Mortality study team

# Discussion – high mortality

- Very young population with a high birth rate
- High mortality
  - CMR beyond emergency threshold
  - U5MR below emergency threshold
  - Maternal mortality far exceeds UN estimates
- Physical, mental and social impact of violence and conflict
- Unmet healthcare needs
- Challenging living conditions

# Impact of special features

- Potentially explain higher estimates
  - Household at ease
  - Less perceived judgement
  - Less time pressure
  - Improved identification of neonatal deaths

Photo by MSF CAR Communications team

# Conclusion – the silent crisis continues

- Situation likely worse since upsurge in violence since December 2020
- UN appeal for funding targets for 2021 still not met
- Need sustained and effective humanitarian and development support across all domains

*Photo by Eve Robinson*
